Cogtics – Brief Answers to MVP Definition Questions

Product & Scope

Primary buyer: CFO (with Finance Ops as co-buyer).

Daily user: Finance analyst / RevOps analyst.

Initial segment: B2B SaaS only.

Minimum size: $5M ARR, 50+ customers, 20+ active contracts.

Time-to-value: Same day; first leakage flags within hours after data sync.

Integrations & Data Sources

Mandatory day-1: Salesforce, Stripe, QuickBooks, PDF contracts.

Read-only coverage of core revenue objects only.

API ingestion plus CSV fallback.

Customer-owned OAuth connections only.

Design partners provide sandbox access.

Data Model & Truth

System of record for customer identity: CRM.

Identity mismatches: Human confirmation with assisted suggestions.

Canonical revenue concept: Revenue Obligation Unit (ROU).

Multi-entity support: Limited in MVP.

Revenue recognition: Out of scope for MVP.

Contract Intelligence

Accepted formats: PDF only (digital text).

Clause-level citations required.

Auto-apply threshold: 95% confidence.

Ambiguity resolved by customer user.

Amendments handled manually in MVP.

Detection Engine

Guaranteed leaks: missing invoice, underbilling, expired discount, wrong price, wrong period, duplicate billing, usage not billed, billing beyond term, currency mismatch.

False positives costly for pricing errors.

Rules plus ML prioritization.

No simulation mode in MVP.

Evidence includes clause excerpt, calculation, and source links.

Workflow & Outputs

Lifecycle: open / resolved / dismissed.

Exports: CSV, PDF, Slack alerts.

No approvals in MVP.

Light playbooks only.

Roles: admin, analyst, viewer.

Performance & Scale

First sync under 4 hours.

Daily detection refresh.

Launch volume: ~100k invoices/year.

Backfill up to 2 years.

Max contract size: 50 MB.

Security & Compliance

SOC2-ready posture.

US and Canada data residency.

24-month default retention.

Platform-wide encryption keys.

No SSO in MVP.

Deployment & GTM

Hosting: AWS.

Target SLA: 99.5%.

Metrics, logs, alerts enabled.

Versioned connectors.

Feature flags for rollback.

Pricing tiered by contract count.

Sales-led onboarding.

Synthetic demo data supported.
